EXPERIENCE

Seansoft Corporation - Software Engineer (Full Stack)

September 2022 - Present

- Collaborated with the team to work with the technical requirements for designing/implementing features primarily using ReactJS, MSSQL, and Express.
- Designed, developed and maintained critical functionalities for a web application supporting multi-tenant architecture including several forms with distinct use cases. automated report generator, email sending system and print report monitoring system.
- Contributed to the initial architecture of the client side of the web application. Created dynamic form components and implemented end-to-end(e2e) and unit tests.
- Reviewed and tested code with the team and provided constructive feedback to improve the quality and maintainability of the codebase.

PouchNATION - Junior Software Developer

June 2021 - December 2021

- Developed components and connected server API to the web app using Javascript, ReactJS and TailwindCSS. Configured and applied LaunchDarkly feature flag and MixPanel analytics to the web app.

PROJECTS

Inventory Management System

September 2022 - November 2022

- The project is developed using MERN stack with Typescript and deployed to the cloud using a Digital Ocean Droplet.
- Migrated an Inventory Management System web app from an existing python project in a span of three (3) months.
- Key features of the project include User Accounts, Dashboard, Transactions, Inventory Stocks, Checkout System and Reports.

EDUCATION

Saint Louis University, Baguio City, Philippines— Bachelor of Science in Computer Science

August 2018- June 2022

Graduated on June 2022 with an honor of *Cum Laude*
